

MR1957-543
Appln. No. 09/866,612
Reply to Office Action of June 3, 2004

Remarks

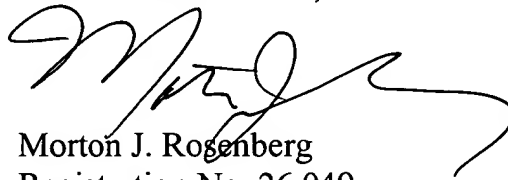

This case has been reviewed and analyzed in view of the Official Action dated 3 June 2004. In the Official Action, the Examiner has restricted the patent application to one of the following: Species One, directed to Figs. 2-4; Species Two, directed to Figs. 5-7; and Species Three, directed to Figs. 8-10.

By this Response, Applicant elects Species One, directed to Figs. 2-4. It is believed by Applicant that the claims readable on Species One are Claims 1-2 and 6-8.

The Examiner has objected to the drawings for labeling of the transparent plate 14a. By this Amendment, the paragraph relating to the transparent plate in the specification has been amended to bring such into conformance with the drawings and the transparent plate in the specification is now depicted as "transparent plate 14a". It is believed that this amendment to the specification obviates the objections to the drawings made by the Examiner.

It is now believed that the subject patent application has been placed in condition for examination and such action is respectfully requested.

Respectfully submitted,
FOR: ROSENBERG, KLEIN & LEE
